3 · Live Demo

Model lifecycle

A great classifier is good.

A great model lifecycle is better.

Predict and store

Predict fraud on labeled or unlabeled input data.

Prioritize recall.

Store incoming data.

Observe

Track service and model metrics.

Detect data drift.

Keep inference available.

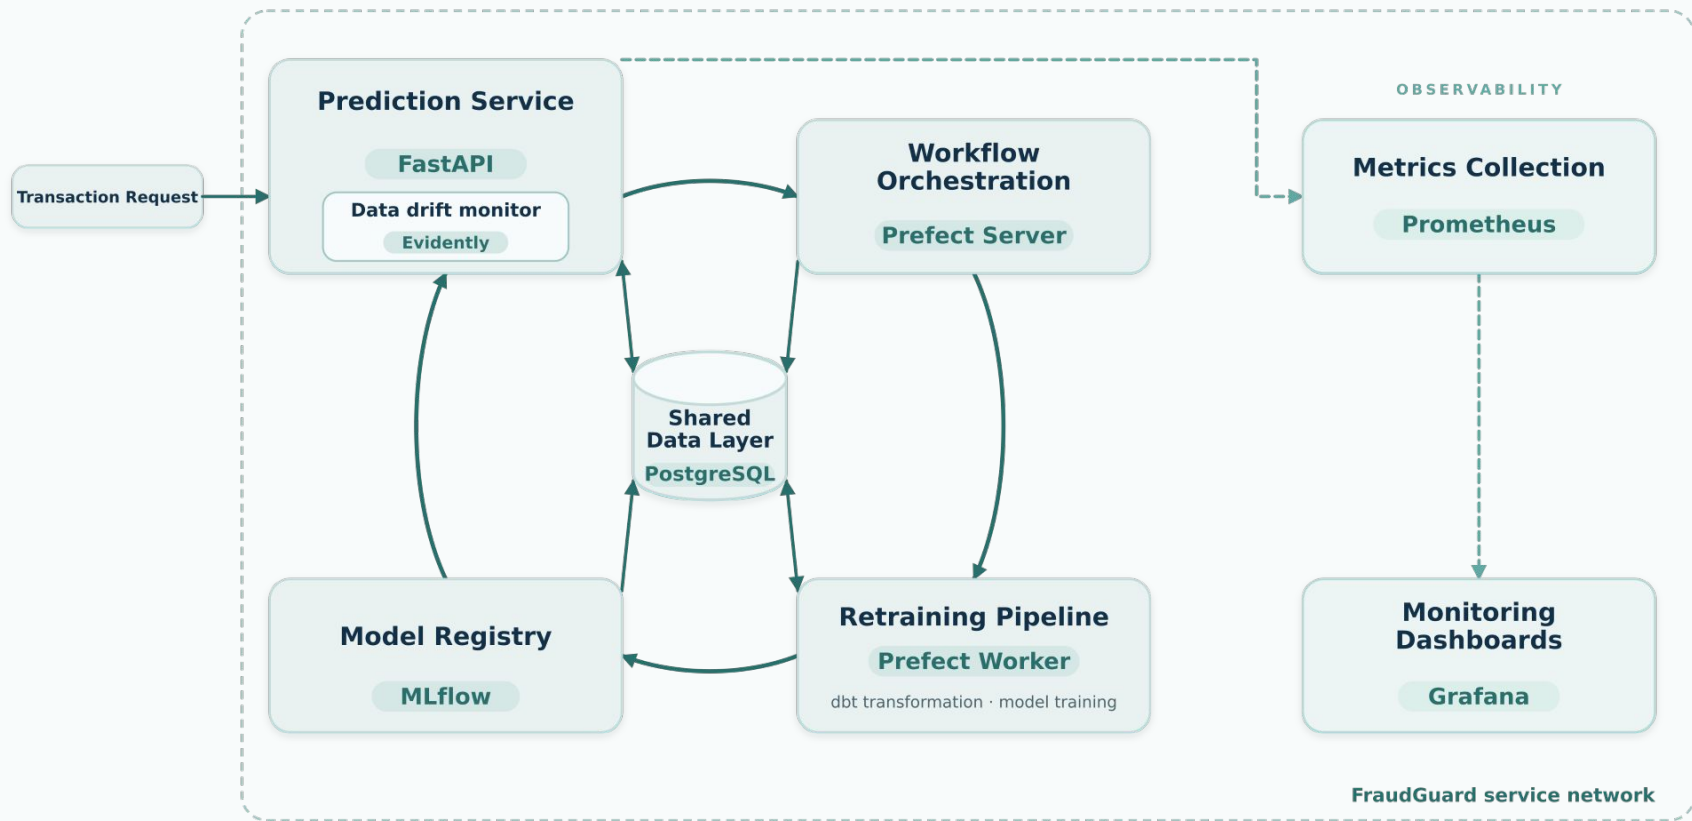

Adapt

Orchestrate retraining.

Version every candidate.

Promote if recall improves.

Architecture

Live Demo

Better safe than without FraudGuard.

Questions & discussion
